 Kolkata, West Bengal

Professional Summary:

Experienced Senior Associate – Quality Assurance with 6 years of expertise in Manual Testing, Functional Testing, API Testing, and Performance Testing across enterprise and web-based applications. Proficient in analysing business requirements, preparing test scenarios and test cases, executing various testing activities, and ensuring software quality throughout the SDLC and STLC. Hands-on experience in REST API testing using Postman, database validation using SQL queries, and performance testing using JMeter, including load, stress, and endurance testing. Skilled in defect identification, root cause analysis, test reporting, and defect lifecycle management using JIRA. Possess working knowledge of Core Java and Selenium with exposure to automation testing concepts. Experienced in Agile/Scrum environments, collaborating with developers, business analysts, and stakeholders to deliver high-quality software solutions. Strong analytical, problem-solving, and communication skills with a proven ability to ensure timely and successful project delivery.

TECHNICAL SKILLS:

- **Manual Testing:** Requirement Analysis, Test Scenario Creation, Test Case Design & Execution, Defect Reporting & Tracking, Defect Life Cycle Management, Requirement Traceability Matrix (RTM), Test Planning, Test Documentation, Test Summary Reporting
 - **Testing Types:** Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), End-to-End Testing, Exploratory Testing, Compatibility Testing
 - **API Testing:** REST API Testing, Request/Response Validation, API Collection Creation, API Chaining, Parameter Validation, Response Verification using Postman
 - **Performance Testing:** Load Testing, Stress Testing, Endurance (Soak) Testing, Performance Monitoring and Analysis using Apache JMeter
 - **Automation Testing:** Selenium WebDriver (Basic), Test Automation Concepts
 - **Programming Languages:** Core Java (Basic)
 - **Database Testing:** SQL Queries, Data Validation, Database Verification
 - **Defect Tracking & Project Management Tools:** JIRA
 - **Methodologies:** Agile Scrum, Waterfall, SDLC, STLC, Defect Life Cycle
 - **Test Management Activities:** Test Planning, Test Estimation, Test Execution, Defect Reporting, Risk Analysis, Release Validation
 - **Operating Systems:** Windows
 - **Version Control:** Git (Basic)
-

Tools & Technologies:

- **Defect Tracking:** JIRA
- **API Testing:** Postman
- **Performance Testing:** Apache JMeter
- **Database:** SQL
- **Automation Testing:** Selenium WebDriver (Basic)
- **Programming Language:** Core Java (Basic)

Technical Knowledge:

- **SDLC** (Software Development Life Cycle)
- **STLC** (Software Testing Life Cycle)
- **Defect Life Cycle**
- **Functional Testing**

- Regression Testing
 - Smoke Testing
 - Sanity Testing
 - Integration Testing
 - System Testing
 - UAT Testing
 - API Validation
 - Agile Scrum Methodology
 - Test Case Design & Execution
 - Requirement Analysis
-

WORK EXPERIENCE

Edifixio India Pvt. Ltd || Senior Associate || March 2022 – Present

Project 1: UIaaS Seamless

Project 2: MYSEHUDSON

Client: Schneider Electric

Project Description:

Worked on Schneider Electric e-commerce portal supporting multiple countries including Australia, Japan, France, China, Denmark, Great Britain, United Kingdom, Germany, and others. The application is an enterprise-level e-commerce platform used for product ordering, pricing, delivery tracking, and invoice management.

Responsibilities:

- Analysed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD)
- Created and reviewed test scenarios and detailed test cases based on business requirements
- Performed end-to-end testing of e-commerce functionalities including product search, product details, pricing, and availability
- Validated order creation, order processing, payment flow, order confirmation, delivery status, and invoice generation
- Performed functional, regression, integration, system, smoke, and sanity testing
- Conducted API testing using Postman for backend validation and verified response data
- Performed database validation using SQL queries to ensure data integrity
- Prepared and maintained Requirement Traceability Matrix (RTM)
- Logged, tracked, and managed defects using JIRA and ensured proper closure with retesting and regression validation
- Participated in Agile Scrum ceremonies including sprint planning, daily stand-ups, sprint review, and retrospectives
- Prepared test execution reports and shared daily/weekly status updates with stakeholders
- Supported production issue analysis and post-release validation testing
- Collaborated closely with developers, business analysts, and product owners to ensure requirement understanding and quality delivery

WORK EXPERIENCE:

Globussoft India Pvt. Ltd.

QA Engineer | December 2019 – March 2022

Project 1: Socinator

Client: Internal Project

Environment: .NET (Windows Desktop Application)

Description:

Socinator is a desktop-based social media automation application used for managing and scheduling activities across multiple platforms including Instagram, Facebook, YouTube, Twitter, Pinterest, LinkedIn, Quora, Reddit, and Tumblr.

Responsibilities:

- Analysed business requirements and prepared test scenarios and test cases.
- Executed functional, regression, smoke, sanity, and re-testing
- Performed non-functional testing and monitored application behaviour
- Conducted client-side testing and end-to-end workflow validation
- Logged, tracked, and reported defects using JIRA and Zoho
- Participated in release testing and ensured application stability

Project 2: Smartffic

Client: Mike

Environment: Node.js, PHP, MySQL

Description:

Smartffic is a web-based social media marketing platform that helps promote Instagram profiles by generating targeted global traffic and engagement. The system includes User and Admin panels for managing activities and monitoring notifications.

Responsibilities:

- **Created and executed test cases based on business requirements**
 - **Performed functional, regression, integration, and system testing**
 - **Validated database records using MySQL queries**
 - **Tested User and Admin modules for role-based access functionality**
 - **Reported and tracked defects using JIRA**
 - **Performed re-testing and regression testing after bug fixes**
 - **Supported UAT and production sanity testing**
-

EDUCATION:

B.Tech (Bachelor of Technology)

Gandhi Institute of Technology and Management (GITAM)

Affiliated to Biju Patnaik University of Technology (BPUT)

CERTIFICATIONS & TRAINING

Manual Testing, Automation Testing (Selenium with Java), and SQL Training – QSpiders, Bangalore
