 Kolkata, West Bengal

Professional Summary

Highly motivated and versatile Automation Tester with 4.7 years of experience and proven strong work ethic and a problem-solving focus in fast-paced environments. Strong expertise in Java, selenium, TestNG, Cucumber and CI/CD pipelines. Proven track record of improving test coverage, continuous improvement, scalable test solutions, reducing manual efforts and leading teams to deliver high-quality software solution.

TECHNICAL SKILLS

Core knowledge of software testing:

- Strong understanding of **SDLC, STLC, and Defect Life Cycle**.
- Familiar with **Test Driven Framework, Cucumber BDD Framework and Data Driven Framework**.
- Proficient in **Agile & Scrum** methodologies.
- Skilled in **Test Planning & Execution** – designing Test Plans, Test Cases, and Test Scripts.
- Expertise in **Regression, Smoke, Sanity Functional Testing, Cross-browser & Parallel Testing**.
- Well-versed in **ATLC (Automation Test Life Cycle)** and test strategy development.
- Good understanding of **Core Java** concepts like **OOP, Collections, and Exception Handling**.
- Expertise in **Selenium WebDriver** for automating web applications across browsers.
- Hands-on experience with **TestNG** for test execution, assertions, and reporting.
- **Implemented Page Object Model (POM)** to enhance test script maintainability.
- Gained hands-on experience in writing and maintaining **Gherkin feature files** to support **behaviour-driven development (BDD)** collaboration between technical and non-technical teams.
- Familiar with implementing **step definitions and integrating Cucumber with Selenium** for automated
- acceptance testing in **Agile environments**.
- Created and managed **API test collections in Postman**, used **environment variables** and **assertions** to support efficient testing across different environment

Automation Testing & Framework Development:

- Strong understanding of **automation feasibility analysis and implementation**.
- Experience in **test data preparation and object repository creation**.
- Expertise in **automation script development, execution, validation, and defect handling**.
- Knowledge of **Maven integration** for optimized test execution and builds.

Collaboration & Process Optimization:

- Involvement in **peer review of test cases/scripts & defect identification**.
 - Effective communication with **developer** for **bug troubleshooting, resolution & debugging**.
 - Maintaining and submitting **test reports & execution status updates**.
-

Tools & Technologies

- **Automation Tools:** Selenium WebDriver, TestNG, Postman, Maven, Jenkins.
 - **Programming Languages:** Java, SQL
 - **Defect Tracking & Test Management:** JIRA, Bugzilla, Zoho.
 - **CI/CD & Version Control:** Jenkins, Git, GitHub
-

Professional Experience

Edifixio India Private Limited
Senior Associate— March 2022 – Present
Project: UlaaS Seamless

- **Designed and maintained** a Hybrid Automation Framework using Selenium WebDriver, Maven, and POM, improving script stability by 20%
- Automated 60% of regression test cases using **reusable functions and data-driven techniques**, significantly reducing manual testing effort
- Managed test data and object repositories to **ensure modular, maintainable scripts** and reduce execution failures by 25%
- **Collaborated with developers** during defect triage and retesting cycles, accelerating bug resolution by 30%
- Used GitHub for version control: **raised PRs** and participated in regular code reviews to ensure framework quality
- Implemented advanced TestNG features such **as grouping, parameterization, and parallel execution** to improve test efficiency
- Applied custom **exception handling** and **smart waits** to minimize **flaky test** cases and improve execution reliability
- Contributed to **Agile ceremonies** such as stand-ups, sprint planning, and retrospectives to ensure testing stayed aligned with development goals

Globussoft Technology private limited
Test Engineer — Dec 2019 – March 2022
Project: Socinator

- **Created and executed manual test cases** for functional and UI testing, ensuring alignment with business expectations
- Conducted thorough regression and smoke testing prior to release cycles, **reducing post-release defects by 18%**
- Participated actively in **test case walkthroughs, peer reviews**, and QA sign-off activities to maintain high-quality standards
- Logged and tracked defects in JIRA, ensuring timely resolution within **SLA and improving defect closure rate by 15%**
- Coordinated effectively with the onshore team for status updates and UAT readiness, **facilitating smooth project delivery**
- Performed API testing using Postman to **validate key integrations**, improving early detection of interface issues by 22%

Certifications & Training:

- Certified in Manual & Automation Testing (Java, Selenium, SQL) – QSpiders, Bangalore.

Education:

- **B. Tech in Electrical Engineering**
Gandhi Institute of Technology & Management, BPUT, Odisha.
-
